

## Press-release

# SoftTree Technologies Announces New Education Licensing Program for DB Audit Expert™

April, 27, 2009

Staten Island, NY — SoftTree Technologies, a leading provider of database management and development solutions, today announced its Enterprise License Program for Education (ELP-EDU) for DB Audit Expert - its industry-leading database security & auditing solution for Oracle, Sybase, IBM DB2, MySQL and Microsoft SQL Server database platforms.

The ELP-EDU licensing program is part of SoftTree's recently unveiled Enterprise License Program (ELP), and allows K-12 and higher education customers worldwide to procure and deploy DB Audit Expert across an entire school, campus and/or system with a single license key and support contract. ELP-EDU is designed to meet the needs of organizations actively seeking to reduce software asset management costs, and is optimized for educational institutions.

The ELP-EDU model is designed to deliver customers a decreased Total Cost of Ownership (TCO) and increased Return on Investment (ROI) across their entire IT infrastructure. ELP-EDU also minimizes the time required for administrator management.

"The DB Audit Expert Enterprise Licensing Program for Education is a logical choice for educational organizations of any size that seek the flexibility and efficiency of managing as few as ten to several thousand database instances," said Bryan Bain, VP of Sale & Marketing of SoftTree Technologies. "DB Audit Expert is the de facto standard for organizations looking to proactively track and analyze database activity and security posture. This new licensing model gives our education customers a new, cost-effective approach for streamlining database security operations."

### Pricing and Availability

DB Audit Expert is available via the ELP-EDU immediately for a fixed price of \$2,500.00.
