## SoftTree Technologies Announces Red Gate License Replacement Program

**Red Gate SQL Prompt and SQL Refactor customers can switch to SQL Assistant for next to nothing!**

STATEN ISLAND, N.Y.--([BUSINESS WIRE](#))--SoftTree Technologies, a leading provider of database management and administration solutions, today announced the availability of a license replacement program for customers and OEM partners of Red Gate Software.

As a result of SoftTree's recently announced SQL Assistant 3.0, many SQL Prompt users have expressed interest in trading their licenses for SQL Assistant. SoftTree's Red Gate License Replacement program enables customers of Red Gate's SQL Prompt and SQL Refactor to trade in their existing licenses for SQL Assistant licenses with no additional capital investment. The only provision is the customer purchase annual software maintenance.

"The SQL tools market is fragmented at best. There has been a dearth of cross-platform tools available," said Dmitriy Evinshteyn, chief technology officer at SoftTree Technologies. "This program presents a great opportunity for DBAs and SQL developers to acquire a comprehensive tool to turbo-charge all of their SQL programming efforts," said Evinshteyn.

Red Gate SQL Prompt customers are switching to SQL Assistant to benefit from SoftTree's IntelliSense+ technology, 3<sup>rd</sup>-generation code auto-completion and visualization technology specifically developed for structured query language (SQL). SQL Intellisense+ leap-frogs the simplistic "type ahead" capabilities inherent in SQL Prompt by providing a multitude of code auto-completion, auto-formatting, and code auto-generation features that enable database developers and DBAs to realize amazing improvements in productivity, code quality and accuracy.

In addition to IntelliSense+, SQL Assistant's built-in refactoring and reformatting engines obviate the need for SQL Refactor. "SQL Assistant is a great tool; far better than SQL Prompt," said Anil Das, a DBA consultant with Fujitsu Consulting. Unparalleled support for all major databases, editors and development environments provides strong incentive for Red Gate customers to switch. SoftTree delivers a compelling set of features in SQL Assistant that are missing in SQL Prompt:

- Support for Oracle, DB2, MySQL, Sybase ASE and Sybase ASA
- 3<sup>rd</sup>-generation IntelliSense+ auto-completion and disambiguation technology specifically developed for structured query language (SQL).
- Intellisense+ delivers unparalleled support for code typing, automatic word completion, database object and attribute browsing, automatic generation of variable declarations, and automatic generation of business-specific code based on the selection of specific data objects.
- Context-sensitive SQL Reference and Help is provided for multiple versions of Oracle, Microsoft SQL Server, IBM DB2 and MySQL databases to aide the user in interactively building SQL commands fully compatible with the target database version.

- SQL Code Structure View provides easy-to-use, one-click navigation and at-a-glance examination of SQL code and procedure logic – eliminating the need for database navigators or tedious browsing.
- SQL refactoring and reformatting provides the capabilities for formatting selected blocks of code, or all the code in the current file.
- SQL Syntax Checker can be used to check the SQL code syntax correctness before the code is actually executed in the database.
- Multilingual Spell Checker is an intelligent tool that selectively checks for spelling errors in relevant parts of the SQL code.
- Support for more SQL editors and database development systems.
- Super fast and small disk and memory footprint.

SoftTree's replacement program will allow Red Gate customers to exchange their now out-of-date technology for the SoftTree SQL Assistant version 3.0 with guaranteed full product support, including access to upgrades and enhancements.

### **Pricing and Availability**

SoftTree's Red Gate License Replacement Program is available immediately. Customers wishing to convert to SQL Assistant are required to provide proof-of-purchase and procure SQL Assistant annual software maintenance, priced at \$30 per copy. Volume discounts are available; please call SoftTree for volume pricing information.

### **About SoftTree Technologies**

SoftTree delivers a power suite of tools for managing and administering the world's most popular database management systems – Oracle, Microsoft SQL Server, MySQL, DB2, and Sybase. DBA-proven, and engineered for the enterprise, SoftTree's solutions include: Scheduling, Job Management, Performance Monitoring and Diagnostics, Configuration Management, Auditing and Compliance, and Data Migration and Transformation. Headquartered in Staten Island, NY, SoftTree's products are sold and supported directly and via authorized resellers and distributors around the globe.
