SoftTree Technologies Announces Recession-busting Productivity Enhancements to SQL Assistant

SQL Assistant v4.6 empowers companies to realize up to a 300% gain in database developer and DBA productivity, as well as improved code quality and accuracy.

STATEN ISLAND, N.Y.--([BUSINESS WIRE](#))--SoftTree Technologies, a leading provider of database management and development solutions, today announced that new version 4.6 of SQL Assistant enables database developers and DBAs to multiply their productivity, realize time savings up to 300% and more, and improve their code quality and accuracy. The new version has been enhanced with the following features:

- 4th generation SQL Intellisense and code-completion technology dramatically reduces SQL programming time.
- Real-time syntax lookup, in-place prompts and checking eliminate the need to reach out to printed manuals or browse the web searching their electronic versions.
- Visual Bookmarks transforms what is today an obscure and rarely used function available in many code editors into one that even seasoned coders will grow to love and use often.
- Syntax help is enhanced via mouse-over hints for procedure and function parameters and for table and view columns for objects whose names contain spaces and special symbols.
- One-click comparison of code in the editor against code in database, files, other editors streamlines error checking processes.

Version 4.6 strengthens SQL Assistant's position as the market's most sophisticated SQL programming productivity tool. Its ability to eliminate up to 300% of keystrokes, automatically generate high quality SQL code, correct SQL syntax and spelling errors, use historical coding patterns to suggest commonly used queries will turbo-charge developer productivity.

SQL Assistant 4.6 supports all major databases. It is shipped pre-configured with support for Oracle, Microsoft SQL Server, IBM DB2, MySQL, PostgreSQL, Sybase ASA and ASE. The product also integrates with many widely used database editors, database management and development environments, as well as DBMS native utilities

Pricing and Availability

SQL Assistant v4.6 is available immediately for SQL Server, Oracle, DB2, MySQL, Sybase, and PostgreSQL database systems. Existing customers with software maintenance agreements can upgrade free of charge.

About SoftTree Technologies

SoftTree delivers a power suite of tools for managing and administering the world's most popular database management systems – Oracle, Microsoft SQL Server, MySQL, DB2, and Sybase. DBA-proven, and engineered for the enterprise, SoftTree's solutions include: Scheduling, Job Management, Performance Monitoring and Diagnostics, Configuration Management, Auditing and Compliance, and Data Migration and Transformation. Headquartered in Staten Island, NY, SoftTree's products are sold and supported directly and

via authorized resellers and distributors around the globe. For more information, please visit www.softtree.com.
